

**SAWTOOTH FISH HATCHERY
ANNUAL REPORT**

October 1, 1989 to December 31, 1990

Prepared by:

Rick Alsager, Fish Hatchery Superintendent III

Table 1. Fish distribution.

Species	Number stocked Salmon River	Number stocked streams	Number stocked lakes
Catchable R9 Rainbow Trout	45,284	7,121	12,189
Westslope C2 Cutthroat Trout	0	6,000	1,055

fishermen all summer, instead of having long voids of poor fishing in between stockings (Table 2). Public response was tremendous, and fishing success was very good when talking to anglers and the local Stanley businessmen.

OTHER RESIDENT HATCHERY PROGRAMS

Sawtooth was also involved in the Yellowbelly Lake restoration project. The hatchery crew helped rotenone the lake in August, and then in following weeks, helped clean up, monitor, and treat the lake with potassium permanganate. The lake was finally declared safe in October. Hatchery personnel assisted in the restocking of the lake with 1,055 westslope cutthroat in late October, and will be involved with additional stockings this spring (1991) and in years to come. We will be monitoring runoff at the inlet stream this year and, hopefully, spawning adults at Yellowbelly in 1992 and 1993. Sawtooth Hatchery also stocked three small tributary streams to the upper Salmon River with westslope cutthroat. These fish, like the ones stocked in Yellowbelly Lake were reared and transferred from Sandpoint Hatchery. These stockings were part of a stream restoration project to give the public different fishing opportunities in the upper Stanley Basin.

Table 2. Fish stockings for 1990.

Record #	Date of plant	Stream name	Species number	Number of plant	Pounds of fish
1	/ /			0	0.00
2	05/25/90	Valley Cr.	R9	508	175.00
3	05/25/90	Salmon River 8	R9	508	175.00
4	05/25/90	Yankee Fork D. Ponds	R9	1,015	350.00
5	06/12/90	Capehorn Lake #2	R9	508	175.00
6	06/18/90	Pettit Lake	R9	1,523	525.00
7	06/18/90	Perkins Lake	R9	1,015	350.00
8	06/19/90	Little Redfish Lake	R9	1,015	350.00
